## Summary

Cloud & Automation Engineer with hands-on experience provisioning AWS infrastructure using HashiCorp Terraform and automating CI/CD pipelines via GitHub Actions. Proficient in Linux system administration, S3 state management, and cloud security best practices. Able to troubleshoot deployment issues and deliver reliable infrastructure as code.

## Technical Skills

**Cloud & Infrastructure as Code**

- AWS Services (S3, EC2, IAM, VPC, Lambda, DynamoDB)
- Terraform (HCL)
- Infrastructure as Code (IaC)
- GitHub Actions (CI/CD)
- State Management

**Tools & Software**

- Linux Administration (Ubuntu)
- Terminal Operations
- Git
- Microsoft Office Suite

**IT Support & Network Operations**

- Hardware & Software Troubleshooting
- Network Fundamentals,
- System Configuration,
- Software Installation and package management.

## Projects

**AWS VPC Infrastructure as Code**

- Provisioned a custom cloud network on AWS using HashiCorp Terraform
- Configured a custom VPC with a public subnet, a private subnet, an internet gateway, a NAT gateway, and route tables
- Controlled inbound and outbound traffic with a custom security group

**AWS Serverless Event-Driven Architecture**

- Built a serverless pipeline on AWS using Terraform.
- Integrated serverless compute functions (AWS Lambda) triggered by object storage events and message streaming services to automate backend processing.

**Production-Grade AWS Multi-Tier Architecture (SAA-C03)**

- Provisioned a VPC, public subnet, internet gateway, route table, and security group with Terraform, and launched an Ubuntu EC2 instance running Nginx
- Set up a CloudWatch CPU alarm that sends email alerts through SNS
- Stored Terraform state in S3 and deployed changes through a GitHub Actions pipeline

**Automated AWS S3 Static Website Hosting & CI/CD Pipeline**

- Hosted a static website on Amazon S3 using Terraform
- Created a dedicated IAM user with a least-privilege policy limited to one bucket.
- Built a GitHub Actions workflow that syncs the site to S3 on every push to main

## Work Experience

**IT Attaché,** *The National Treasury & Economic Planning – State Department for Economic Planning* 05/2025 – 08/2025
Nairobi, Kenya

- Provided first-line technical support to staff.
- Installed, configured, and benchmarked software applications, performing systematic testing and user validation.
- Helped troubleshoot printers, photocopiers, and network connectivity issues.
- Performed routine maintenance of computer systems and peripherals.
- Managed data backup procedures, ensuring strict file organization, data integrity, and compliance with operational guidelines.

## Certifications

- AWS Serverless Demonstrated
- AWS Cloud Support Associate Specialization
- AWS Cloud Quest: Cloud Practitioner - Training Badge
- Infrastructure as Code with Terraform
- AWS Knowledge: Cloud Essentials - Training Badge

## Education

**Bachelor of Business Information Technology,** *Mount Kenya University* 2022 – 2026
Nairobi, Kenya
